

Aljun C. Cursiga - Curriculum Vitae

PERSONAL INFORMATION

TECHNICAL SKILLS

PROJECTS & SOFTWARE EXPERIENCE

Full-Stack Web Development | School Publication Website

Developed and maintained a live publication website that organizes school yearbook content into a clean, accessible, and professional web presence.

Handled layout decisions, stakeholder revisions, content organization, and responsive presentation for students and publication users.

PROJECTS & SOFTWARE EXPERIENCE

Full-Stack Web Development | Local Business Website

Built a client-ready website for a printing service, presenting business information, services, and contact pathways in a direct and user-friendly structure.

Focused on mobile-friendly navigation, service clarity, and practical layout decisions that support customer inquiries.

Full-Stack Web Development | Organization Website

Currently developing an organization website with emphasis on page structure, information flow, online visibility, and stakeholder-centered revisions.

Applies full-stack thinking by planning how user-facing pages, content, and future data-driven features can work together coherently.

Full-Stack Mobile Development | Employment Platform Concept

Designed a mobile app where users can create accounts, post job opportunities, browse openings, and apply for available work.

Demonstrates understanding of user roles, authentication flow, job listing data, application workflows, and mobile-first usability.

Machine Learning Project | Crop Recommendation Model

Built a machine learning project using a Random Forest model to recommend suitable crops based on soil-related inputs and agricultural conditions.

Strengthened practical knowledge in data preparation, model training, prediction logic, and explaining results to non-technical users.

EDUCATIONAL BACKGROUND

University of Mindanao Tagum College | 3rd Year Standing | Expected Graduation: 2027

Relevant coursework: Software Engineering, Web Development, Mobile Application Development, Data Structures and Algorithms, Database Concepts, Systems Analysis and Design, Java Programming, and Data Analysis.

PROFESSIONAL HIGHLIGHTS

ALJUN C. CURSIGA Full-Stack Web Developer BS Computer Science | Web Development, Mobile Development, and Applied Machine Learning Santo Tomas, Davao del Norte | 09654617308 aljun.dev@gmail.com | github.com/Nakauli |

Languages & Development Areas Java - object-oriented programming, logic building, and software engineering fundamentals HTML5 / CSS3 / JavaScript - responsive, client-facing web interfaces Front-end and back-end development - full-stack project planning, account flows, and data handling Mobile development - mobile-first screens, user flows, and app feature planning Machine learning - Random Forest model workflow and data-driven recommendation logic | Tools & Platforms Git & GitHub - project portfolio, version tracking, and code organization VS Code - web development and project implementation Microsoft Office / Google Workspace - documentation, reports, and presentations Canva and video editing - visual communication and project support materials Spreadsheet-based data analysis and structured information handling

Core Competencies Full-stack web application development Responsive website design and client-ready presentation Requirements gathering and stakeholder communication Software design, documentation, testing, and revision Machine learning project development and model explanation | Soft Skills Clear communication with classmates, clients, and project stakeholders Analytical and structured problem-solving Team-oriented, teachable, and dependable under deadlines Detail-conscious, adaptable, and committed to continuous learning Confident in presenting project purpose, workflow, and technical decisions

Aurium Yearbook Publication Website | 2025 - Present

Hontoria Printing Website | 2025

COPS Interpol Website | Ongoing

BuHayLink - Job Posting and Application Mobile App | 2026

Crop Random Forest Model | 2026

Bachelor of Science in Computer Science | 2023 - Present

Portfolio-driven developer: Built live websites and app-based systems that can be discussed, demonstrated, and improved. | Client-aware builder: Translates user needs into clear interfaces, organized content, and practical feature flows.

Full-stack orientation: Understands both the visible user experience and the back-end logic needed to support it. |

Technical communicator: Can explain project purpose, workflow, limitations, and improvement plans in a clear interview setting.
